TRAM MAP

SEVERE WEATHER PREP & COMMUNICATIONS :

KNOW YOUR PLAN!

STAY ALERT. BE PROACTIVE.

STAY ALERT: Monitor the weather closely and take the necessary precautions to ensure your safety. Nashville Speedway may not provide adequate protection from extremely high winds, lightning, hail, or tornadoes. There is no basement or approved tornado shelter on property.

SECURE LOOSE ITEMS: If you are tailgating or camping, please secure loose items including tents, grills, coolers, flags, and awnings. Seek shelter if conditions worsen.

LIGHTNING: Lightning can strike as far as 10 to 15 miles from the area where it is raining. That's about the distance you can hear thunder. The National Weather Service indicates if you can hear thunder, you are within striking distance, and it recommends seeking shelter immediately.

SHELTER: Though no place is absolutely safe from severe weather, if you are caught outside, the safest location is a large enclosed building. Nashville Speedway has limited enclosed buildings, and if any guests are unable to seek shelter in an enclosed structure, the National Weather Service recommends seeking shelter in an enclosed metal vehicle. The National Weather Service also recommends staying away from tall, isolated objects.

STAY UPDATED-COMMUNICATION & RADIO CHANNELS.

Borchetta Bourbon Music City Grand Prix INDYCAR Weekend Officials and Staff will be closely monitoring the weather at all hours throughout the event weekend. Guests are encouraged to stay alert and informed by tuning-in and/or utilizing the communication channels outlined below.
